Subject: 2007 Plan Amendments

Hassan,
I apologize for the late comments, but our team received the plan amendment info today.

CPA 06-20 West College Ave. and 14th Street SW

This proposed plan amendment is further to the west than the South County Recreational Corridor Plan (see below) alignments, but I recall during the Walkable Communities Workshop in Ruskin that the community is very interested in making cycling and walking connections throughout Ruskin. I recommend that any changes to the roadways include sidewalks and if a collector road, on-road bike lanes. Multi-use trails could also be included especially for access to the water, but there are no existing trails to connect to at this time.

CPA 06-28 Transportation Element Map and Text change

Standards call for all road widening project (except limited access) to include on-road bike lanes and sidewalks. There are also several roads identified as "Enhanced roads". These enhancements should clearly indicate the intent to include the addition of bikeways, sidewalks, and pedestrian improvements at intersections. A few of these corridors are also near existing multi-use trails (Lutz Lake Fern Road, S. Mobley Road) or near future multi-use trails (US 301, SR 674, CR 574, Balm Wimauma)

CPA 07-01 Density Increase for Adoption/Child Care Projects

CPA 07-03 Wimauma Village Plan and CPA 07-04 Scaffold Road and CR 579

The county's South County Recreational Corridor Plan is going before the BOCC in early 2007. A great deal of work has been done to identify greenway and trail corridors. This link has all the info and maps.

<http://www.hillsboroughcounty.org/parks/planninganddesign/southcounty.cfm> Both plan amendments could positively affect the South County Corridor Plan by incorporating the recommended trails.

CPA 07-05 Riverview Riverfront District
