

## Summary of Changes To Hillsborough County Stormwater Element GOPs

Goal	Objective	Policy	Moved From	Moved to	Type	Comment
						Environmental Protection Commission Update - Policy 1.1 is amended to include scientifically-based ecological buffer requirements in the existing stormwater management system. All new development shall be designed such that post-development stormwater runoff from the site shall be substantially similar to or better than predevelopment runoff in terms of rate, hydroperiod, and drainage basin, and shall meet applicable state and water management district water quality standards. <u>To protect water quality from stormwater runoff, scientifically-based ecological buffers shall be incorporated into all land development plans. (see the Conservation and Recharge Element)</u>
1	1	1.1			Administrative	
1	1	1.2			Administrative	Public Works Department Update - Policy 1.2 is amended to more clearly define the existing stormwater management system.
1	1	1.3			Administrative	Public Works Department Update - Policy 1.3 is amended to identify Hillsborough County's Stormwater Quality Management Ordinance, 94-15 as an enforcement tool to improve countywide agricultural stormwater discharge
1	2	2.1			Administrative	Public Works Department Update - Policy 2.1 is deleted and reserved because the Comprehensive Countywide Watershed Management Plan has been completed.
1	2	2.2			Administrative	Public Works Department Update - Policy 2.2 is amended to update the timetable for completion of individual Watershed Master Plans.
1	2	2.3			Administrative	Public Works Department Update - Policy 2.3 is amended to identify SWFWMD guidelines and specifications to be referenced in updating individual Watershed Management Master Plans.

## Summary of Changes To Hillsborough County Stormwater Element GOPs

Goal	Objective	Policy	Moved From	Moved to	Type	Comment
